Rating scale for diseases (area of flag-1 leaf affected):

Numbers in parentheses indicate relative rank in column.

^{1 = 0-3%}, 2 = 4-14%, 3 = 15-29%, 4 = 30-49%, 5 = 50-69%, 6 = 70-84%, 7 = 85-95%, 8 = 96-100%.

BYDV ratings (see scale above) were based on percentage of plants showing foliar symptoms.
